Optimized for best performance in clinical chemistry testing

System Reagents for Indiko and Konelab
clinical and specialty chemistry analyzers

ThermoFisher
SCIENTIFIC

Complete system solutions

Thermo Scientific™ system reagents offer best-in-class methodologies and fully standardized performance. They are specially developed and optimized for Thermo Scientific™ Indiko™ and Konelab™ clinical and specialty chemistry analyzers. CE marked system reagents are ready-to-go and fully IVD compliant in volume optimized bar-coded kits.

Excellence in clinical chemistry testing

Uncompromised patient results

CE marked and fully IVD compliant

A complete system solution comprised of Thermo Scientific analyzer(s), reagents, accessories and consumables means

- Thermo Fisher Scientific as a manufacturer is responsible for the correctness of the application
- Your laboratory is using a CE marked system based on the In Vitro Diagnostic Medical Device Directive (IVDMDD)
- All application protocols and claims have been fully validated and tested in accordance with IVDMDD

Accurate and reliable information

Thermo Scientific system solutions offer an uncompromised level of performance and clinicians receive accurate and reliable information.

- Clinicians can optimize and standardize diagnosis and patients get best possible care
- Clinicians can compare inter-laboratory patient results with greater confidence
- Clinicians are more able to work within treatment regimes recommended by professional bodies, like IFCC, NGSP, NKDEP

Compliance and traceability

Thermo Scientific methods are compliant with international professional bodies recommendations such as:

- International Federation for Clinical Chemistry (IFCC)
- National Glycohemoglobin Standardization Programme / Diabetes Control and Complications Trial (NGSP/DCCT)
- National Kidney Disease Education Programme (NKDEP)

The methods are traceable to international reference methods and materials.

Increased cost-efficiency

Volume optimized, ready-to-go system reagents

Convenience and reduced waste

- Reagent kits are bar-coded and volumes are optimized to minimize waste
- No pouring over - save time and errors
- No additional on-site method adjustment
- Best-in-class methodologies offer maximum reagent stability, with less calibration, QC and repeats
- Dedicated support from one company with faster resolution of any issues - instrument or reagent.

Fully supported and guaranteed, CE marked system solutions

- Maximum stability and reduced waste
- Standardized performance in external quality assurance
- Streamlined supply and support

Your laboratory can have full confidence in the accuracy, precision and the quality of results.

Fully automated, easy-to-use Indiko and Indiko Plus analyzers with the extensive system reagent menu offer operational excellence for patient monitoring.
